"World Friends Korea (WFK)" Advisors Program Guide

Th
e

Government of the Republic of Korea wishes to contribute to the economic and social development of your country by sharing the know-how it has accumulated throughout the course of its economic development in an effort to maintain friendly relations with your country.

- The Korean government also intends to join the efforts to attain various international development objectives, including the Millennium Development Goals (MDGs), and assist the identification of development projects suited to the strategies set up by aid recipient countries by utilizing the official development assistance (ODA) of the Korean government.
- To this end, the Korean government has set up a program to dispatch experts with ample experience in the public sector to your government and the public institutions of your country for the provision of technological and managerial consultation in the public service sector.
- The program is aimed at providing policy consultation for the economic and social development of your country in the area of exploration and planning of development projects, as well as technological and managerial consultation for the promotion of such projects.

Program

- Relevant area: Public sector (please choose from the options listed in the sub-sectors category in the following reference page.)
- Number of advisors available for dispatch: One to five experts for each partner country
b-sectors can be more than five the sub-sectors category in the following reference page. *You may choose more than five sub-sectors if necessary.
*The maximum number of experts to be dispatched around the world is 100.
- Dispatch period: From six months to one year (the period may be extended upon mutual agreement)
- Expenses for dispatch: All expenses to be borne by the Korean government

Description of the Sub-Sector Areas

Program Guide

(1) Consulting on vocational training

- (Details) **Formulation of vocational training systems and career consultation**; provision of **training courses for skilled workers**; **formulation of laws and regulations** needed to reform practical educational courses, develop teaching materials, and enact a national qualification act; provision of career consultation by introducing a career consultation system for each training institution; and establishment of a general operation plan.

(2) Consulting on human resource development

- (Details) Provision of advice on the cultivation of technical human resources and the establishment of an operation plan; development of education content and curricula; support for the education of skilled human resource; and review of the current status of HRD policy.

(3) Consulting on e-learning service systems

- (Details) Establishment of online education equipment and basic infrastructure; provision of technical assistance for the introduction of Internet-based distance learning and teleconference for remote regions; development of education content and curricula for online learning; and provision of **training for instructors**.

(4) Consulting on educational information systems

- (Details) Consultation on the provision of services concerning personnel, budgets and accounting through a nationwide network of elementary and secondary schools and regional educational offices. Provision of support for the information-based operation of students' attendance in class, grades, and health status.
 - * How to establish the education-related administrative information system and operate the e-Learning system.

(5) Consulting on family planning

- (Details) Formation of family planning policy and management systems; consultation on family planning campaigns; and development of human resources for population and public health policy, and health center management.

(6) Consulting on public health

- (Details) Research on local health needs and the establishment of a local public health plan based on data; human resource development for public health policy managers, local public health workers and emergency health workers; and provision of intensified training on the operation and maintenance of medical equipment.

Program Guide

(7) Consulting on customs administration

- (Details) Provision of support for the establishment of order relating to foreign trade by imposing and collecting duties on imported goods and ensuring that customs clearance for exported/imported goods is carried out in accordance with the proper procedures.
- * Setting up a procedure for export/import customs clearance, reporting dishonest acts of trade - including smuggling, automation of EDI-based customs clearance, and adoption of container inspection devices.

(8) Consulting on government budgetary accounting systems

- (Details) Consultation on investigation of the current status of budget accounting systems and the establishment of future strategies and an appropriate model.

(9) Consulting on emigration and immigration control

- (Details) Support for the enhancement of overall emigration and immigration management capacity.
- * Analysis of new trends of international migration; border control management; and immigration information systems.

(10) Consulting on the enhancement of statistics-related governmental capability

- (Details) Consultation on ways of compiling reliable governmental statistics to check social and economic status.
- * Plan for making a statistical database, establishment/management of a governmental statistics database, transfer of statistical compilation techniques and methods of statistics-related collaboration and coordination.

(11) Consulting on the development of a government data center

- (Details) Support for making plans for the sustainability of the data center; formulation of a strategy for optimum usage of the data center for e-government applications; and training partner countries' data center managers and operation experts.

(12) Consulting on trade facilitation

- (Details) Support for strengthening knowledge and capacity in terms of trade promotion and drawing action plans through lectures on the establishment of e-trade systems.
- * Establishment of e-trade systems: Trade settlement, e-bills of lading, e-negotiation, etc.

(13) Consulting on mid- and long-term development strategies

Program Guide

- (Details) Enhancement of adaptability to the global economy through increased efficiency of capital market, provision of advice on policy and system financial reforms; formulation of mid- and long-term economic development goals; performance-based management systems; and support for enhancing the capacity of public officials.

(14) Consulting on stock exchanges

- (Details) Provision of advice on the improvement of human resource capacity and the introduction of know-how and experience in the stock market field; enhancement of the efficiency of financial systems to foster a sound market; and training of officials and market participants.

(15) Consulting on postal information systems

- (Details) Consultation on how to improve the postal service, automate the postal logistics system based on new u-IT technologies, and enhance operational efficiency.
- * Establishment of the postal address information system, real-time logistical tracing system, unmanned postal counter system, and the postal financial business system.

(16) Consulting on the industrial disaster insurance system

- (Details) Laying the foundation for the stable operation of the industrial disaster insurance system by providing support to advance the social insurance system and improve skills relating to industrial disaster insurance.
- * Design, operation and education relating to industrial disaster insurance.

(17) Consulting on housing construction and urban planning

- (Details) Consultation on housing policies, construction and management, establishment of urban planning, and promotion of the relevant projects.
- * Establishment of housing policies and urban planning, formation of industrial complexes, plans for the overhaul of streams, connection and supplementation of nearby roads and park-related plans.

(18) Consulting on the attraction and hosting of international events, such as the Olympic Games, and management of society

- (Details) Consultations on preparations for international events, selection of suitable sites, hosting such events and subsequent management of the facilities.
- * Skills for the hosting and running of international events (including selection of suitable sites, capability for hosting and operation of the relevant systems), and subsequent operation/management of such facilities as indoor gyms.

Program Guide

(19) Provision of technological support to developing countries to enhance their competitiveness

- (Details) Transfer of know-how relating to the enactment and execution of, or amendment to, the competition/consumer-related laws and regulations of Korea, which has, on the basis of its rapid economic development, graduated from the status of a developing country to that of an advanced country within a short period of time.

- * Enactment and execution of, or amendment to, the competition-related laws, surveys of the relevant cases, and economic analyses.

(20) Consulting on SMEs promotion

- (Details) Consultation on methods of providing support to SMEs, including the invigoration of startups and support relating to funds, human resources and exports.

- * Establishment of policies on fostering SMEs, coaching on how to improve their corporate structure, provision of technological support to SMEs, supply of cash liquidity to SMEs in times of difficulty, and development of designs.

(21) Consulting on the establishment of the e-government system

- (Details) Helping implement administrative services more efficiently via the electronic operation of the work of administrative institutions, and utilizing information technology.

- * E-procurement, automatic collection of charges, e-resident control, e-postal services, and the GPS system.

(22) Consulting on IT promotion policy

- (Details) Support for the establishment or upgrading of IT systems of partner countries that are reliable and compatible and able to meet the requirements of international standards; and training of users.

(23) Consulting on "Saemaeul Undong" (New Village Movement)

- (Details) Support for capacity building on rural development by introducing Korean cases and the "Saemaeul Undong" methodology and know-how to partner countries; and support for the establishment of a policy framework for agricultural and rural development.

(24) Consulting on farming technology development (crop production/irrigation)

- (Details) Support for farming technology development through the provision of advice on irrigation (planning, designing, and management), human resource development in farming technology, and training of technicians.

Program Guide

- (25) Consulting on comprehensive water resource management/drought information management
- (Details) Consultation on methods of water supply/demand, improvement of water quality based on the comprehensive development of water resources and a system that will ensure the smooth supply of water to households.
 - * Basic survey of water resources, construction/operation of dams, management of waterside facilities, establishment of a water management information system.
- (26) Consulting on the development of agricultural technology
- (Details) Joint development of food/animal feed/vegetable/livestock resource production systems to combat international food shortages; provision of support for the acquisition of farming resources and the training of farmers.
 - * Exploration of programs aimed at the development of farming and rural areas and the transfer of agricultural technologies with high added value.
- (27) Consulting on the establishment of the power supply system and the opening of the market
- (Details) Consultation on the development of diverse power sources, the opening and operation of the power supply market, such as power metering and the collection of charges, and the design of the nationwide power transmission network, including the maintenance of quality.
 - * Development of power sources (i.e., hydraulic, thermal or wind power), the design of the nationwide power transmission network, the drawing up of a power supply/demand plan, and the development of a demand prediction model.
- (28) Consulting on the establishment of infrastructure for nuclear power-related safety regulations and power plants
- (Details) Provision of consultation on how to establish a safety regulations infrastructure under the obligations stipulated in the relevant international conventions prior to the introduction of nuclear power plants, as well as methods of constructing nuclear power plants.
 - * Enactment of the laws and regulations concerning nuclear power safety, establishment of the relevant regulating institutions, training of the regulating personnel, assessment of environmental impact, and the design of power plant facilities.
- (29) Consulting on and technological support for petroleum quality control
- (Details) Petroleum quality control in an era of high oil prices for the prevention of disturbances of petroleum distribution amid increasing oil consumption necessitated by economic development and the provision of support for the

development of the oil and energy-related sectors.

- * Fuel quality control, improvement of petroleum product quality, research concerning fuels and lubrication oils, and exchange of information on petroleum-related technologies.

(30) Intelligent Transportation System (ITS)

- (Details) Support will be provided to establish an efficient, safe and inexpensive transportation network by linking the ITS to the existing system.
- * Collection and processing of real-time information on road traffic, establishment of the core infrastructure for ITS, and the drawing up a plan to improve vehicle speed on roads and expand/extend the road network.

(31) Consulting on the construction of airports and the installation/operation of flight safety facilities

- (Details) Provision of experts and the relevant technologies, utilizing the know-how accumulated by Korea over the past 30 years concerning the operation of airports and its unique strength in the domain of information technology.
- * Construction and operation of airports, Flight Information Display System, flight safety facilities, and operation of road paving facilities.

(32) Consulting on the construction and operation of railroads

- (Details) Consultation on the systematic management of railroad services, which consists of complicated processes involving road beds, tracks, power supply, signalization, communication and rolling stock.
- * Updated construction techniques, design/operation of high-speed trains, and planning the operation of rolling stock.

(33) National R&D planning

- (Details) Support for planning models that can compete in international markets; support for planning R&D programs; and provision of advice on the implementation of R&D policies.

(34) Consulting on forestation technology

- (Details) Consulting on technologies and administrative procedures concerning ODA projects for international collaboration, including the prevention of desertification.
- * Growing saplings and breeding plants, forestation, erosion control, logging and processing.

**"WORLD FRIENDS KOREA"
ADVISORS PROGRAM**

nipa

KOICA

Korea International Cooperation Agency
The National IT Industry Promotion
Agency

The Government of the Republic of Korea has the honor to inform you that the Korean Government has set up a "World Friends Korea (WFK)" program, which started in 2010, to dispatch Korean experts with many years of experience in various fields to your country at the expense of the Government. The WFA program is aimed at providing support for the socioeconomic development of your country in the area of the exploration and planning of development projects, as well as technical and managerial consultation for the promotion of such projects.

In this regard, the Korean Government is pleased to inform you of the qualifications of the Korean experts of the WFA program, possible to be dispatched to your country in 2011.

The implementing agencies are the Korea International Cooperation Agency (KOICA) and the National IT Industry Promotion Agency (NIPA) and the implementing agency for your country will be notified once all requests are received from all other partner countries.

■ **Duration of Dispatch:** The minimum duration is six months up to one year

* *The duration may be extended upon mutual agreement during their stay in your country*

■ **Age:** 50 years old or above

■ **Education:** Bachelor's degree or above

■ **Experience:** More than 10 years working experience in a relevant area

■ **Language:** Intermediate or above level of proficiency in spoken and written English

The attached Job Description is designed to ask your government the needs and the results expected by your government from the WFK program. In order for the Korean Government to dispatch relevant experts upon your request, please fill out the attached form in detail and submit the form to the Korean Embassy ~~no later than 18 February 2011.~~ Your cooperation would be greatly appreciated.
